

WSQ IMPLEMENT LEAN SIX SIGMA

Course Overview:

This course teaches participants how to approach, understand and apply the lean transformation process systematically. It is designed to equip participants with the board knowledge and tools to map the transformation for a system wide approach for developing and implementing lean six sigma project plans.

Key Topics:

- Define five principles of lean
- Understand the lean culture and six sigma tools
- Value stream mapping tool
- Improve process stability and efficiencies
- Understand the just-in-time methodology
- Review lean measurement tools
- Implement lean design, analyze failures and ensure ongoing quality and continuous improvement
- What are the eight types of waste and how to correct them

Course Outline:

- Map and evaluate business process using Value Stream Mapping tool
- Defines and establishes the value flow as pulled by the customer
- Identify and analyse non-value added steps or activities in a process using Value Stream Mapping tool
- Design and implement improvements to the business process
- Measure and evaluate the improvement measures implemented against determined specifications
- Implement a system of continuous-improvement in the process
